# Blockchain based Voting Network (Consensus Based Oracles)

## ONE PAGER

**7s (SEVENS)** is a cryptocurrency of 50 trillion coins build on its own blockchain.

Users (**Oracles**) can evaluate **statements** (news, videos, social connections, pictures, urls etc.) both quantitatively (through votes indicating their degree of agreement ranging from 0% to 100%) and qualitatively using plus emojis.

These Oracles bet 7s on their vote. Any vote has a weighting that decreases over time.

The screenshot shows a voting interface for a statement: "Woman sues soccer superstar Cristiano Ronaldo, accuses him of rape". The statement is from WGN-TV and is 71% supported. A progress bar shows 71% agreement. A video thumbnail of Cristiano Ronaldo is visible. A tooltip shows the following data:

4	7s0-60%
15	7s61-81%
7	7s82-100%
EARNINGS	
1415 Sevens	

At the bottom, it shows "Your Coins: 1000 | Your Percentage: 79%" and a "VOTE & EARN" button. On the right, it shows "7s COINS: 2843" and "ORACLES: 26".

## ORACLES & STATEMENTS

The screenshot shows a voting interface for a statement: "Iran travel WARNING: UK warns against 'all but ESSENTIAL travel' for dual citizens". The statement is from Express.co.uk and is 19% supported. A progress bar shows 19% agreement. A video thumbnail of a woman is visible. At the bottom, it shows "Earnings: 7s COINS: 2445" and "ORACLES: 2507 | 16". A "SHARE & EARN" button is present.

Depending on votes within the 1<sup>st</sup> hour these statements get **seeds of 7s**.

After 24h an average of these statements is calculated and **Oracles** that bet +/-10% on the **average** get all 7s of those who miss this average.

Oracles can argue, connect and follow each other. The higher the seeds the more interest you generate.

## WHY 7s - Problems we solve

- 7s is getting **users** out of their social bubble **into discussions**
- You don't **argue** against different opinions for free but **for coins**
- **Oracles** can be selected via blockchain by anyone to testify anything – (**disrupt insurance**)
- Polls, involvement and clicks can be easily **targeted by companies with bought seeds**
- **Influencers** earn in an easy and transparent way **together** with their **followers**
